Automotive Lighting

A SIM, fundada em 1946 afirma-se no mercado como uma referência na iluminação e refletorização automóvel, produzindo uma gama diversificada de faróis, farolins, projetores e refletores. Com lâmpadas ou com LEDs, para camiões e semi-trailers, automóveis, ciclomotores e motos, máquinas agrícolas e industriais. A SIM desenvolve cada produto desde a conceção, desenvolvimento, produção de ferramentas e moldes, ensaios e testes até à produção de cada componente e montagem final, o que combinado com um sistemático controlo de qualidade total, permite satisfazer o cliente mais exigente.

A SIM produz também sistemas de cablagem dedicados às OEM (primeiro equipamento). Esta reunião de capacidades, aliada aos mais de 80 anos de experiência, permite comercializar produtos através de uma rede de distribuição instalada em mais de 50 países, tanto no primeiro equipamento como no After-Market. A evolução tecnológica e o conhecimento dos mercados têm sido fatores preponderantes na dotação à empresa de equipamentos modernos e eficazes no aumento do valor do produto e na redução do seu custo. Adotou uma política de crescimento sustentado, investindo em tecnologia de ponta, elevados padrões de qualidade, respeito pelo ambiente, apostando em produtos inovadores e na especialização dos seus recursos humanos.

DESIGN

La Société SIM, fondée en 1946, s'affirme sur le marché comme une référence en matière d'éclairage et de réflectorisation automobile, produisant une gamme diversifiée de phares, feux arrière, projecteurs de travail et catadioptrés. À lampes ou à LED, pour camions et semi-remorques, voitures, cyclomoteurs et motos, machines agricoles et industrielles, SIM développe chaque produit dès la conception et le développement, jusqu'à la fabrication des outillages et des moules, la réalisation d'essais et tests, la production de chaque composant et l'assemblage final, qui combiné à un contrôle de qualité total systématique, permet de satisfaire les clients les plus exigeants. SIM produit également des systèmes de câblage [faisceaux] dédiés aux OEM [première monte].

Cette combinaison de capacités, liée à plus de 80 ans d'expérience, permet la commercialisation des produits à travers d'un réseau de distribution installé dans plus de 50 pays, soit dans la première monte, soit dans le marché de l'après-vente. L'évolution technologique et la connaissance des marchés ont été des facteurs prépondérants pour doter la Société d'équipements modernes et efficaces pour augmenter la valeur du produit et réduire son coût. SIM a adopté une politique de croissance soutenue, investissant dans la technologie de pointe, les normes de haute qualité et le respect de l'environnement misant sur des produits innovants et sur la spécialisation de ses ressources humaines.

SIM was founded in

1946

80 YEARS OF HISTORY

Since then SIM has managed to get a strong position in the automotive lighting market. A wide range of products are manufactured by SIM: headlamps, rear lamps, working lamps, auxiliary lamps, and reflex reflectors. With bulbs or LEDs, for commercial vehicles, trucks and trailers, work and agricultural machines, and even some motorcycles, SIM products are designed from the early stages of research and development, through the tooling and molds design and production, testing procedures, the production of each component, and the final product assembly.

This involvement plus a systematic total quality control assures the satisfaction of the most demanding customers. SIM also produces wiring sets for OEM clients. The technological evolution and market knowledge have been the main factors in the company's investment allocation strategy, focused on getting modernly equipped and more efficient in order to increase product value and reduce its cost. SIM adopted a policy of sustained growth, investing in cutting-edge technology, high quality standards, respect for the environment, betting on innovative products and on the specialisation of its human resources.

Farolins Função Individual

Versatilidade é a principal razão para utilizar farolins de função individual. Seja por opções de design ou restrições de espaço, os farolins de função individual permitem equipar no veículo todas as funções necessárias com total liberdade de aplicação.

Feux à Fonction Unique

La polyvalence est la principale raison d'utiliser les feux arrière à fonction unique. Que ce soit en raison d'options de conception ou de restrictions d'espace, les feux à fonction individuelle permettent au véhicule d'être équipé de toutes les fonctions nécessaires avec une liberté d'application totale.

80 YEARS OF HISTORY

Single Function Lamps

Versatility is the main reason for applying single function lamps. Either due to design options or space limitations, the single function lamps allow the vehicle to be equipped with all necessary functions and total application freedom.

80 YEARS OF HISTORY

Positions Lamps

All around the vehicle are position lights to ensure we are seen by other drivers. White lamps on the front, yellow lamps on the side and red lamps on the rear, without or with reflex-reflector to increase road safety.

Farolins de Posição

Em toda a volta dos veículos há luzes de presença que garantem que estes sejam vistos pelos outros condutores. Luzes brancas à frente, luzes amarelas nas laterais e luzes vermelhas na traseira, sem ou com reflector para aumentar a segurança passiva.

Feux de Position

Tout autour des véhicules il y a des feux-de-position pour s'assurer que nous sommes vus par les autres conducteurs. Feux blancs à l'avant, feux jaunes sur les côtés et feux rouges à l'arrière, sans ou avec catadioptré pour augmenter la sécurité passive.

80 YEARS OF HISTORY

Special Lamps

When operating local council vehicles they are often amidst vulnerable road users in streets or towns etc. All work vehicles and their operatives have a duty of care to the surrounding public and themselves with regards to public and personal safety. The Vehicle Avoidance Lights (VALs) can project an 'area of high risk' around the vehicle which should be kept unobstructed. By doing so this helps to ensure the safety of those in close proximity to the vehicle. This lamp is part of a special lighting range that includes emergency lights and daytime running lights combined with other functions.

www.sim-sa.com

Farolins Especiais

Veículos municipais costumam operar entre usuários vulneráveis da estrada em ruas ou cidades, etc. Todos os veículos de trabalho e seus operadores têm o dever de zelar pelos cidadãos ao seu redor e para com eles próprios no que diz respeito à segurança pública e pessoal. As luzes de prevenção de veículos (VALs) projectam uma "área de alto risco" em torno do veículo que deve ser mantida desobstruída. Ao fazer isso, garantem a segurança das pessoas que estão próximas do veículo. Este farolim integra uma gama de iluminação especial que inclui luzes de emergência e luzes diurnas combinadas com outras funções.

Feux Spéciales

Les véhicules municipaux circulent souvent parmi les usagers vulnérables de la route, dans les rues, dans les villes, etc. Tous les véhicules de travail, et leurs opérateurs, ont le devoir de prendre soin de l'environnement public, et d'eux-mêmes, en ce qui concerne la sécurité publique et personnelle. Les feux Vehicles Avoidance Lights (VALs) peuvent projeter une «zone à haut risque» autour du véhicule qui doit rester dégagé. Ce faisant, cela aide à assurer la sécurité des personnes à proximité du véhicule. Ce feu intègre une gamme d'éclairage spécifique qui comprend des feux de secours et des feux de jour associés à d'autres fonctions.

DOWNLIGHT

O downlight define uma zona de segurança ao longo de toda a parte lateral do veículo, projectando luz sobre o solo. Esta zona iluminada permite ao condutor ter uma noção exacta do espaço e salvaguarda a segurança dos outros utilizadores da via.

The downlight defines an 'area of high risk' along the entire side of the vehicle, projecting light to the ground. The illuminated area allows the driver to have an exact notion of the space and safeguards the safety of other road users.

Le downlight définit une « zone à haut risque » sur tout au tour du véhicule, projetant la lumière vers le sol. La zone éclairée permet au conducteur d'avoir une notion précise de l'espace et préserve la sécurité des autres usagers de la route.

Cables and Connectors

Specially for original equipment manufacturers (OEM), we internally produce all types of wiring sets, combined with a wide range of certified connectors for all types of vehicles, including those for transporting dangerous goods (ADR). This internal capability gives us total flexibility to customize solutions that meet our customer's needs.

Cabos e Conectores

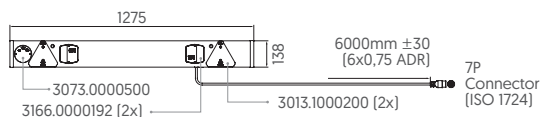

Direcionados sobretudo ao primeiro equipamento [OEM], produzimos internamente todo o tipo de cablagens, combinadas com uma vasta gama de conetores certificados para todo o tipo de veículos, incluindo os de transportes de matérias perigosas [ADR]. Esta capacidade interna dá-nos total flexibilidade para personalizar as soluções à medida exacta das necessidades do cliente.

Câbles et vvConnecteurs

Destinés principalement aux premiers équipements [OEM], nous produisons chez-nous tous types de câblages, associés à une large gamme de connecteurs certifiés pour tous types de véhicules, y compris ceux transportant des matières dangereuses [ADR]. Cette capacité interne nous donne une flexibilité totale pour personnaliser les solutions à la mesure des besoins exacts du client.

**Celebrating 80 years of history
and 20 years of ISO 14001
environmental certification,
we take another step toward
sustainability.**

**Small Changes,
Big Differences.**

www.sim-sa.com

80 YEARS OF HISTORY

Pequenas mudanças, Grandes diferenças.

As nossas embalagens poderão chegar com embalagens de cartão reutilizado, em substituição do plástico (airpad).

ESTA MEDIDA TEM COMO OBJETIVO:

Reduzir o uso do plástico
Diminuir o impacto ambiental
Dar uma segunda vida a materiais já existentes

Acreditamos que a sustentabilidade se constrói através de pequenas decisões diárias, capazes de gerar mudanças significativas a longo prazo.

Small Changes, Big Differences.

Our packaging may include recycled cardboard instead of plastic (airpad).

THIS MEASURE AIMS TO:

Reduce the use of plastic
Reduce environmental impact
Giving a second life to existing materials

We believe that sustainability is built through small, everyday decisions that can generate significant long-term change.

De petits changements, De grandes différences.

Nos emballages peuvent inclure du carton recyclé au lieu du plastique (coussinet d'air).

CETTE MESURE VISE À :

Réduisez l'utilisation du plastique
Réduire l'impact environnemental
Donner une seconde vie aux matériaux existants

Nous croyons que la durabilité se construit grâce à de petites décisions quotidiennes qui peuvent engendrer des changements significatifs à long terme.

ANNIVERSARY AUTOMOTIVE LIGHTING SINCE 1946

This whole set of skills along with the 80 years experience, allow us to sell our products through a distribution network over 50 countries, for both OEM and After-Market, with exportation representing more than 80% of our business.

Esta reunião de capacidades, aliada aos 80 anos de experiência, permite comercializar produtos através de uma rede de distribuição instalada em mais de 50 países, tanto no primeiro equipamento como no After-Market, com a exportação a representar mais de 80% do nosso negócio.

Cette combinaison de capacités, liée à 80 ans d'expérience, permet la commercialisation des produits à travers d'un réseau de distribution installé dans plus de 50 pays, soit dans la première monte, soit dans le marché de l'après-vente, avec l'export représentant plus de 80% de notre activité.

Evolution Knowledge

The technological evolution and the market knowledge have been very important and allowed us to keep improving processes, raising the value of the products and reducing its cost at the same time.

A evolução tecnológica e o conhecimento dos mercados têm sido fatores preponderantes na dotação à empresa de equipamentos modernos e eficazes no aumento do valor do produto e na redução do seu custo.

L'évolution technologique et la connaissance des marchés ont été des facteurs prépondérants pour doter la Société d'équipements modernes et efficaces pour augmenter la valeur du produit et réduire son coût.
