LIGHTS UP YOUR WAY

COMPETENCECREDIBILITYAMBITION

A SIM, fundada em 1946, afirma-se no mercado como uma referência na iluminação e refletorização automóvel, produzindo uma gama diversificada de faróis, farolins, projetores e refletores. Com lâmpadas ou com LEDs, para camiões e semi-trailers, automóveis, ciclomotores e motos, máquinas agrícolas e industriais, a SIM desenvolve cada produto desde a conceção, desenvolvimento, produção de ferramentas e moldes, ensaios e testes até à produção de cada componente e assemblagem final, o que combinado com um sistemático controlo de qualidade total, permite satisfazer o cliente mais exigente. A SIM produz também sistemas de cablagem dedicados às OEM (primeiro equipamento). Esta reunião de capacidades, aliada aos mais de 75 anos de experiência, permite comercializar produtos através de uma rede de distribuição instalada em mais de 50 países, tanto no primeiro equipamento como no After-Market. A evolução tecnológica e o conhecimento dos mercados têm sido fatores preponderantes na dotação à empresa de equipamentos modernos e eficazes no aumento do valor do produto e na redução do seu custo. Adotou uma política de crescimento sustentado, investindo em tecnologia de ponta, elevados padrões de qualidade, respeito pelo ambiente, apostando em produtos inovadores e na especialização dos seus recursos humanos.

SINCE1946

RIGOR EXCELLENCE QUALITY

SIM was founded back in 1946. Since then SIM has managed to get a strong position in the lighting automotive market. A wide range of products is manufactured by SIM: headlamps, rear lamps, working lamps, auxiliary lamps, and reflex reflectors. With bulb or LEDs, for commercial vehicles, trucks and trailers, work and agricultural machines, and even some motorcycles, SIM products are designed since the early stage of the research and development, through the tooling and molds design and production, the test and essay procedures, the production of each component, and the final product assembly. This involvement plus a systematic total quality control assure the satisfaction of the most demanding customers. SIM also produces wiring sets for OEM clients. This whole set of skills combined with more than 75 years of experience allow SIM to sell it's products through a network spread along 50 countries, for both OEM and after market. The technological evolution and the markets knowledge have been the main factors in the company's investment allocation strategy, focused on getting modernly equipped and more efficient in order to increase product value and reducing its cost. SIM adopted a policy of sustained growth, investing in cutting-edge technology, high quality standards, respect for the environment, waging on innovative products and on the specialisation of its human resources.

La Societé SIM, fondée en 1946, s'affirme sur le marché comme une référence en matière d'éclairage et de réflectorisation automobile, produisant une gamme diversifiée de phares, feux arrière, projecteurs de travail et catadioptre. À lampes ou à LED, pour camions et semi-remorques, voitures, cyclomoteurs et motos, machines agricoles et industrielles, SIM développe chaque produit dès la conception et le développement, jusqu'à la fabrication des outillages et des moules, la réalisation d'essais et tests, la production de chaque composant et l'assemblage final, qui combiné à un contrôle de qualité total systématique, permet de satisfaire les clients les plus exigeants. SIM produit également des systèmes de câblage (faisceaux) dédiés aux OEM (première monte). Cette combinaison de capacités, liée à plus de 75 ans d'expérience, permet la commercialisation des produits à travers d'un réseau de distribution installé dans plus de 50 pays, soit dans la première monte, soit dans le marché de l'après-vente. L'évolution technologique et la connaissance des marchés ont été des facteurs prépondérants pour doter la Société d'équipements modernes et efficaces pour augmenter la valeur du produit et réduire son coût. SIM a adopté une politique de croissance soutenue, investissant dans la technologie de pointe, les normes de haute qualité et le respect de l'environnement, misant sur des produits innovants et sur la spécialisation de ses ressources humaines.

LIGHTS UP YOUR WAY

FAROLINS FUNÇÃO INDIVIDUAL

SINGLE FUNCTION LAMPS

FEUX À FONCTION UNIQUE

Versatilidade é a principal razão para utilizar farolins de função individual. Seja por opções de design ou restrições de espaço, os farolins de função individual permitem equipar no veículo todas as funções necessárias com total liberdade de aplicação.

Versatility is the main reason for applying single function lamps. Either due to design options or space limitations, the single function lamps allow the vehicle to be equipped with all necessary functions and total application freedom.

La polyvalence est la principale raison d'utiliser les feux arrière à fonction unique. Que ce soit en raison d'options de conception ou de restrictions d'espace, les feux à fonction individuelle permettent au véhicule d'être équipé de toutes les fonctions nécessaires avec une liberté d'application totale.

LIGHTS UP YOUR WAY

DOWN LIGHT

"Veículos municipais costumam operar entre usuários vulneráveis da estrada em ruas ou cidades, etc. Todos os veículos de trabalho e seus operadores têm o dever de zelar pelos cidadãos ao seu redor e para com eles próprios no que diz respeito à segurança pública e pessoal. As luzes de prevenção de veículos (VALs) projectam uma "área de alto risco" em torno do veículo que deve ser mantida desobstruída. Ao fazer isso, garantem a segurança das pessoas que estão próximas do veículo."

"When operating local council vehicles they are often amidst vulnerable road users in streets or towns etc. All work vehicles and their operatives have a duty of care to the surrounding public and themselves with regards to public and personal safety. The Vehicle Avoidance Lights (VALs) can project an 'area of high risk' around the vehicle which should be kept unobstructed. By doing so this helps to ensure the safety of those in close proximity to the vehicle."

"Les véhicules municipaux circulent souvent parmi les usagers vulnérables de la route, dans les rues, dans les villes, etc. Tous les véhicules de travail, et leurs opérateurs, ont le devoir de prendre soin de l'environnement public, et d'eux-mêmes, en ce qui concerne la sécurité publique et personnelle. Les feux Vehicles Avoidance Lights (VALs) peuvent projeter une « zone à haut risque » autour du véhicule qui doit rester dégagé. Ce faisant, cela aide à assurer la sécurité des personnes à proximité du véhicule."

DOWNLIGHT

O downlight define uma zona de segurança ao longo de toda a parte lateral do veículo, projectando luz sobre o solo.
Esta zona iluminada permite ao condutor ter uma noção exacta do espaço e salvaguarda a segurança dos outros utilizadores da via.

The downlight defines an 'area of high risk' along the entire side of the vehicle, projecting light to the ground.
The illuminated area allows the driver to have an exact notion of the space and safeguards the safety of other road users.

Le downlight définit une « zone à haut risque » sur tout au tour du véhicule, projetant la lumière vers le sol.
La zone éclairée permet au conducteur d'avoir une notion précise de l'espace et préserve la sécurité des autres usagers de la route.

EVOLUTION KNOWLEDGE

A evolução tecnológica e o conhecimento dos mercados têm sido fatores preponderantes na dotação à empresa de equipamentos modernos e eficazes no aumento do valor do produto e na redução do seu custo.

The technological evolution and the market knowledge have been very important and allowed us to keep improving processes, raising the value of the products and reducing its cost at the same time.

L'évolution technologique et la connaissance des marchés ont été des facteurs prépondérants pour doter la Société d'équipements modernes et efficaces pour augmenter la valeur du produit et réduire son coût.

Esta reunião de capacidades, aliada aos mais de 75 anos de experiência, permite comercializar produtos através de uma rede de distribuição instalada em mais de 50 países, tanto no primeiro equipamento como no After-Market, com a exportação a representar mais de 80% do nosso negócio.

This whole set of skills along with the +75 years experience, allow us to sell our products through a distribution network over 50 countries, for both OEM and After-Market, with exportation representing more than 80% of our business.

Cette combinaison de capacités, liée à plus de 75 ans d'expérience, permet la commercialisation des produits à travers d'un réseau de distribution installé dans plus de 50 pays, soit dans la première monte, soit dans le marché de l'après-vente, avec l'export représentant plus de 80% de notre activité.
